

Second level errors

Reviewing second-level import validation errors

Below is a list of the possible errors that may exist in your newly imported file if you have a file that fails the formatting validation on the import screen. The box on the right side contains a brief explanation of each error and how to approach correcting it.

All corrections can be made in the import processing screen. Once the corrections are completed, the file must be re-processed.

Note: In the descriptions below, the term detail record refers to an employee’s deduction record.
